Tradetack STAB

Aerosol Adhesive

General Description

Tradetack STAB is an aerosol adhesive which has a variety of uses including fixing foam backed carpets, bonding flexible foams, fixing polythene building sheets and as a stationery and card bonding adhesive.

Tradetack STAB is a synthetic polymer solution blended with a suitable LPG propellant to give an easy spray aerosol with a very low tendency to penetrate normal surfaces. It has a foaming action that allows it to sit up on the surface after application.

Not suitable for use with plasticised PVC or expanded polystyrene foam.

Application

Shake before use. Spray adhesive from 6" to 8" away onto one or both surfaces. Surfaces should be free of dust, dirt, grease and any other contaminants liable to impair adhesion.

The adhesive is normally sprayed onto both surfaces and allowed to dry for 2-5 minutes before consolidating the bond.

Physical Data

Type	Synthetic rubber / resin
Specific gravity	1.18
Viscosity	Sprayable
Solids content	27.5%
Packaging	500ml cans
Shelf life	12 months in a cool, dry area. 5°C to 25°C in unopened cans.
